

In today's modern world, more and more law firms are using high-tech services to support their fee earning work. In the search for the competitive edge, Legal Practices are adopting new techniques that have transformed other industries, whether it is big data, cloud computing or new digital tools to improve user experience and reduce time consuming tasks. **Our senior level management team has over 20 years' experience in the legal profession having held board level positions at a number of leading national and regional law firms.**

We understand the often unique requirements of law firms in terms of culture and person-fit. We also have a depth of understanding of the key technologies involved from document management and billing systems, case-workflow, CRM to digital dictation, desk top virtualisation and data security required within the profession.

We work with an ever-growing list of outstanding law firms and technology firms including:

Our Services: **italent**

Staff Augmentation - Flexible Contract Resources

With cross-European coverage, Inspire provides on-demand resources to ensure you have the right skills, when needed, to supplement your in-house teams. We work rapidly to deliver the best available talent in the marketplace for your project for the time you need, whether this is days, weeks or months. Our flexible and agile service is designed for lead times of within seven days, but we can often get people to site inside 48 hours.

Not everyone can work successfully under the intensity of urgent projects with critical time-lines. We take care to select talented, flexible, high-performing candidates who can deliver immediate value to your project. The resources we deploy have the technical skills, experience, influencing skills and motivation to make effective decisions, and adapt quickly to your organisation.

All our contractors are put through BPSS (Baseline Personnel Security Standard) security clearance and have been technically vetted. This enhanced level of service gives you peace of mind that our resources not only have the requisite skills but are eligible to work on site saving your internal HR team significant time and additional cost. We can also provide full financial sanctions checks, if required.

Permanent Staff

Whilst jobs are booming in the IT sector – especially in the areas of big data, digital development, Cloud network infrastructure and cyber security – we know it can be all too time consuming for hiring managers to find candidates with the right skills and talent to fill these key positions in an increasingly competitive market.

Often these strategically important roles develop in an organisation over time and are bespoke to your Company. It is never as simple as finding the right technical skills. The can-do-attitude, fit and entrepreneurial flair of candidates is just as critical.

Our technical knowledge coupled with our day-to-day experience of the market ensures that we present a selection of motivated candidates with the right qualities and key skills for our clients' complex and technically advanced environments.

We have a proven track record of finding specialists across the EMEA region when they are needed urgently. We use a number of routes to market including our own trusted Team Inspire Network of skilled candidates who have proven capability and are referenced and vetted by us.

How we work

Our management team are highly regarded members of the legal and IT digital community. We know what to ask to interrogate your brief and fully understand the person fit/ culture fit as well as the detailed technical specification.

That means we can quickly identify who to supply from our highly-skilled talent pool, Team Inspire, either specialist resources that we have worked with time and time again on our own IT services projects or trusted contractors whom we have deployed to client sites.

For us, the "right place, right time" isn't a matter of luck – it's our core skill of supplying the right people you need for the job you need doing.

As a result you will be presented with a higher number of better qualified, and motivated candidates, for your review.

Technology and Capability

inspire

Big Data

- Hadoop
- Microsoft
- Hortonworks
- Oracle
- SAP
- Salesforce
- Machine Learning

Capability:
Big Data Architect
Big Data Consultant
Big Data Developer
Hadoop Developer
Chief Data Scientist
Data Analyst – Predictive
Head of Data Analytics
Data Scientist

Application Development

- Scala
- .Net
- Java
- Android/iOS
- HTML-5
- CSS
- C# / C++
- Python
- UI / UX
- Roku

Capability:
Architect
Lead Front End Developer
Full Stack Developer
Back End Developer
Application Developer
Lead Developer
Developer
Web Developer
Project Manager
Mediaroom Specialist
